

## **CIEHF's upcoming webinars: Defence, Design and Occupational Health**

**Friday 17 November at 17:00 GMT**, promises a conversation with CIEHF member **Will Tutton**. Will is an ergonomist holding a senior position within Dstl, the [Defence Science and Technology Laboratory](#), a body which aims to ensure that innovative science and technology contribute to the defence and security of the UK. Dstl is an executive agency, sponsored by the Ministry of Defence.

Will is likely to be familiar to many as a frequent presenter, trustee of CIEHF and Council member, as well as an enthusiastic supporter of mentoring. Whilst Will may touch on elements of the work he is involved in, the conversation will aim to provide a pen-picture of Will as a member. This will include hearing from Will on his background, education and his interest in ergonomics & human factors. He will reflect on his career path, the team at Dstl, the challenges of life as an ergonomist in this particular environment, his aspirations, his insights as a trustee, and his vision for the contribution ergonomics can and should make in the future.
