Dear *Wienne*

Many thanks for sending me the draft of the new articles of the IEA.

There are only two points which I think are important, one is the second paragraph of Article 7 on page 2 - the phrase, "shall release them from responsibility" is a curious one which may have some significance in Switzerland, but I cannot think of the exact English equivalent. The second one is a minor typographical error in the third paragraph of Article 8. I think the phrase should read, "The President and the Council shall hold office from the time of their election ....."

Yours sincerely,

Dr. Robert Murray  
Medical Adviser
