One delegate from Finland have to be elected later, as we yet have no information about who are going to attend the 5th IEA Congress from there. We hope this arrangement can be acceptable for you.

According to your schedule for the number of delegates, we assume that our Society can have 8 delegates. We have between 300 and 400 members. This size group is not given in your set up, but will fell inn between 6 and 10 delegates. If we are wrong in our understanding, please let us know.

We are very sorry for our late answering, but we still hope our response will reach you in acceptable time. Thank you for useful information about the IEA and the 5th Congress, and the very best wishes for the fortcomming events in Amsterdam in June.

Yours sincerely
on behalf of the Nordic Ergonomics Society
