| Briefly describe any significant challenges your Society / Network faced since last annual report. | <ul style="list-style-type: none"> • All board members hold full-time professional positions, which limits the amount of time they can dedicate to the Society's volunteer activities. Consequently, several initiatives could not be implemented as originally planned. For instance, the Young Ergonomists Training Program (ErgoJunior) scheduled for last year was postponed, and the development of systems to support the registration of professional human factors specialists and ergonomists in Thailand was deferred. • The Society continued to face constraints due to the limited number of sponsors from external organizations and companies. |
