7th April 2015

IEA Awards Committee,
Attention Andy Imada,
California, USA
PastPres@iea.cc

Dear Andy,

RE: IEA FELLOW AWARD NOMINATION FOR PENNY SANDERSON

I understand that the Human Factors and Ergonomics Society (HFES) is nominating Professor Penny Sanderson as an IEA Fellow for 2015. I write this letter in support of this nomination.

I have known Penny for more than 20 years in a professional capacity both within Australia, and internationally. Penny has established and led research institutes in Human Factors at universities in Melbourne and Brisbane, during this period. She has been instrumental in providing leadership both within Australia and internationally in the area of cognitive ergonomics.

Penny's work has been published extensively in the peer review journals of human factors and ergonomics during this period. She has travelled extensively at an international level to present her research and participate in collaborative projects.

Penny has been the keynote speaker of many conferences on cognitive ergonomics around the world and is held in the highest regard. She has previously received awards in recognition of her contribution to our profession in many countries of the world.

Through the leadership of Penny, graduate students have enabled this area of research to continue to expand in to a range of application areas.

Penny has provided over 40 years of commitment to her research, teaching, and application at an international level. I would regard her as a worthy candidate for international recognition as an IEA Fellow.

Yours sincerely,

David C Caple
